Tricoflex - Genuine Tricoflex Hose produced by TRICOFLEX s.a. as part of their comprehensive range of technical, watering and irrigation hoses sets the standard for the professional irrigation hose demanded by the grower and nurseryman. Available from 12.5mm (1/2") to 50mm (2") bore.

Designed especially for the professional grower and nurseryman to give long, trouble free service wherever water is needed. Ideally suitable for farm and industrial applications.

High quality production from virgin materials ensure a guaranteed performance to the technical specification and worldwide reputation enjoyed by this product for very many years.

Yellow hardwearing UV stabilised cover.

Knitted reinforcement to give high pressure specification and excellent flexibility.

Intermediate PVC layer to give kink - crush resistance.

Smooth inner PVC lining to give best flow characteristics.
